

Environment, Safety & Health (ESH) Policy

The objective of this document is to define the intention and direction of the Aeronautics Company related to Environment, Safety and Health (ESH) as summarized by our policy statement: “ESH is Everyone's Responsibility.”

The Aeronautics Company is committed to implementing programs that:

- Protect our employees, the environment and local communities;
- Ensure full compliance with legal and other requirements (i.e. compliance obligations), to include corporate and customer requirements;
- Prevent pollution, conserve natural resources, reduce waste and continually progress toward zero waste;
- Prevent injuries and ESH incidents and continually progress toward zero injuries;
- Integrate ESH requirements into the business life cycle, including business development, product and service design, supply chain, manufacture, test, operation, sustainment and program close out;
- Develop ESH performance objectives to promote continual improvement of the ESH Management System, reduce adverse impacts, and reduce risk.

Aeronautics is committed to the corporate initiatives, “**Target Zero**,” and “**Go Green**.” The goal of the “**Target Zero**” initiative is to foster a workforce which strives for zero injuries and promotes a culture where all employees have a “zero injury/accidents” mentality. The “**Go Green**” initiative seeks to eliminate adverse environmental impact from Aeronautics operations by reducing energy and water consumption and amount of waste generated and increasing site recycling.
