

PAC-3[®]

The PAC-3 family of missiles are combat-proven Hit-to-Kill interceptors that defend against incoming threats - including tactical ballistic missiles, cruise missiles, advanced threats and aircraft - using direct body-to-body contact that delivers exponentially more kinetic energy on the target than can be achieved with blast fragmentation mechanisms. Seventeen nations have chosen PAC-3 for missile defense.

Performance

Economic Impact

PAC-3 MSE Capabilities

Building on the combat-proven PAC-3 CRI, the PAC-3 MSE expands the lethal battlespace with a two-pulse solid rocket motor, providing increased performance in altitude and range.

Maneuverability

Larger control fins and upgraded actuators increase agility

Precision

Engages threats through Hit-to-Kill technology

Protection

Defends ground forces and critical assets against current and evolving threats

Range

A large dual-pulse solid rocket motor extends reach and adds thrust
