

LampreyMMAUV™

Multi-Mission Autonomous Undersea Vehicle

Detects, disrupts, decoys and targets enemy forces, supporting assured access and sea denial missions.

LampreyMMAUV™

LOCKHEED MARTIN

The LampreyMMAUV is a new class of smart, stealthy, do-it-all submersibles built to disrupt and deny enemy forces at sea. Building on Lockheed Martin's decades of undersea vehicle experience, the system has proven its autonomous maneuver and surveillance capabilities in at-sea exercises and tests. Its open design and internal bay can accommodate a wide range of customizable mission payloads for subsea seabed warfare.

DEPLOY

Hitches a ride with ships or subs. Charges batteries en route with a built-in hydrogenerator.

DENY

Launches aerial drones for surveillance or strike. Carries torpedoes internally.

DISRUPT

Disrupts enemy sensors with decoys.

LampreyMMAUV Mission Advantages:

- *Large, 24 cubic foot internal payload bay:* Carries torpedoes, decoys, sensors, or UAVs
- *Next-gen Mission Autonomy:* Follows complex commands and operates in teams
- *Easy to upgrade, load out, and maintain:* Access to all major systems in minutes
- *Innovative docking to ships or subs:* Moves with the fleet and stays mission-ready
